The Official Newsletter of the U.S.S. Kitty Hawk ♦ NCC-1659

Mar/Apr 2016

THE WRIGHT STUFF

Volume 27 - Number 2

is a publication of the U.S.S. Kitty Hawk, the Raleigh, N.C., chapter of STARFLEET, an international STAR TREK fan organization. This publication is provided to all chapter members in good standing. Please address all correspondence to CATBIRD Publications, 5017 Glen Forest Dr., Raleigh, N.C. 27612. This publication is a non-profit enterprise and is not meant to infringe upon any copyright or trademark held by Paramount Pictures, Gulf & Western, or any other holder of STAR TREK copyrights or trademarks. Unless otherwise noted, ENTIRE CONTENTS ARE COPYRIGHT © 2016 CATBIRD Publications, THE WRIGHT STUFF. Nothing in whole or in part may be used without the written permission of the publisher. THE WRIGHT STUFF assumes all material submitted for publication is gratis. The publisher and editors reserve the right to edit all submissions.

The Center Seat

By John Troan

First, Thank You to everyone for their cards, e-mail, Facebooks posts, IMs, etc., on the way-too-early passing of my dad. Another Thank You to those who attended the memorial service. I've heard that several people had scheduling conflicts and would've otherwise also been there. The intent is very much appreciated. Thank You.

Brad has gotten through his surgery and is now happy to be recovering at home. I talked to him earlier this week and the cabin fever is starting to set in. He's also written an update that [appears elsewhere in this issue](#).

At risk of repeating the CO report (and the summary) from the April meeting.....

The latest STARFLEET Communique (2015 3Q) has been published and is available to current 'FLEET members for download through the [STARFLEET database](#). (Please contact me if you need your login ID.) The CQ is available only via download for now, but there's still an effort in the 'FLEET Communications department to identify a print solution. (My guess is it'll be some kind of print-on-demand.)

Region 1 has a couple of department head positions that are open: **Fitness** and **Logos and Graphics**. Contact me if you're interested and I'll put you in touch with the folks at Region 1.

New news from Region 1:

- A big Congratulations! to our friends down east as the shuttle *White Eagle* has just launched. (This is the crew we've been working alongside at Crystal Coast Con.) From the 'Hawk to the 'Eagle: May the wind be at your backs as you sail smoothly into the future.
- The region is also asking for this year's donation for the Space Camp Scholarship fund. The challenge that's been issued is \$25 from each chapter in the region. I'll collect donations at the next few meetings and send a single check from all of us in August.

- The biannual election cycle for the Regional Coordinator has started. I'll share more information as I get it.

Leading the local (*Kitty Hawk*) news is the appointment of Larry Cox as our CFO and (Chief) Yeoman. In searching for a suitable *Trek*-appropriate title, Brad pointed out to me that Yeoman is the position that handles the administrative tasks on board. Upon hearing that, I decided this was the match of real-world function and ship-board title I needed... Congrats, Larry!

This leads to why we need a CFO...

I'd like to re-establish a treasury for the chapter, but need to make sure we get everything set up right. It appears that the first step is forming our legal entity ("corporation?") through the NC Secretary of State office. This puts us on track to get our EIN (Employer ID Number) and a bank account established.

As part of establishing our legal entity, "corporate officers" will be named – CO, XO, 2nd officer, and Yeoman (CFO) are my initial choices – but I'm looking for input on the fifth person and if we want to grow the "corporate board" in the future. I plan to borrow from what STARFLEET has done, since they've already gone through all of this.

The goal of the treasury is to be able to help out crewmembers and friends that are in need. I'd also like to be able to cover a few recurring chapter costs -- mainly our future Meet Up membership in an attempt to get word out of our existence. Additionally, we can start making charitable donations once the treasury has built up a little.

The first notes about the treasury are that DUES WILL BE VOLUNTARY -- and low (about six bucks a year per person?). Please note that since we don't have a bank account yet, we won't be doing any dues quite yet.

The second note is that all expenditures will be put to a vote (via meeting and/or e-mail) of all current contributors. (Translation -- people

will have voting input over what their dues get spent on.)

The third note is that the newsletter will remain a free publication. Once we started posting it on the web site for any and all to freely read, it will be impractical (and just plain not nice) to change this aspect of the newsletter.

All of this -- especially the legal entity and treasury parts -- are works in progress, so some things will likely change as we learn more.

In closing this month, I now have the long-promised (very) preliminary rank and promotion system tables.

Points	Description
Ship Functions	
1 / mo	STARFLEET membership
1	Attend monthly meeting and/or dinner
3	Host monthly meeting
2	Attend anniversary dinner
3 / mo	Major chapter role <ul style="list-style-type: none"> ➢ XO ➢ Second Officer ➢ CFO ➢ Social Media Officer ➢ Others as they're identified and filled
Newsletter	
5	Edit / assemble an issue
2	Department report
2	First non-dept report
1	Second non-dept report
0	Additional articles
Charity	
10	Kitty Hawk Function <ul style="list-style-type: none"> ➢ UNC-TV ➢ First Night
5	Non-KH charity event ... need to work on details on awarding these

- The list of point earnings is by no means complete and more things will definitely be added – especially anything related to the podcasts.
- I'm not yet sure how the voluntary dues will be worked into this, so this is another future new item.
- The points are based partially on the system previously used onboard (Thank You, JR!) and from a couple of other STARFLEET chapters' point systems.

Points	Rank	SF	SFM
OTS	O1	Ens	2 nd Lt
60	O2	Lt, j.g.	1 st Lt
120	O3	Lt	Capt
240	O4	Lt Cdr	Maj
480 +OCC	O5	Cdr	Lt Col
960	O6	Capt	Col

- This may change, especially the points needed for promotions to O3 and above.
- STARFLEET requires OCC for O5 and above.

Comp Ops Report By John Troan

The Comp Ops report is going to be much shorter this month, mostly because of the pressing deadline to get *something* written very quickly.

The [International Space Station is hopping with a lot of activity](#) at the moment – and with a record-tying six vehicles docked to the station. There’s currently both Soyuz capsules (for crew), a pair of Progress modules (Russian cargo transport), and a pair of U.S. commercial cargo modules, (one each from SpaceX and Cygnus). [Orbital ATK’s Cygnus launched in March](#) and [SpaceX’s Dragon launched during the first week of April](#).

Part of the cargo onboard this Dragon is [a proof of concept experiment called BEAM](#). It’s an inflatable module that will eventually be hard-docked to the station and checked several times a year over the next two years to make sure it’s still doing well. If BEAM proves to be a success, similar habitats could be used on the spacecraft used for the manned Mars missions or as surface structure on the moon or Mars.

Speaking of Mars, the current leader in the “Martian marathon” is the [Odyssey orbiter, which launched fifteen years ago this](#)

[month](#). As noted in the JPL article, *Odyssey* broke the endurance record for Mars spacecraft in December 2010 and is still going strong. While the science and observation duties are what its best known for, it also has another critical duty – a communications relay between the surface rovers and Earth.

The [Cassini mission](#) is also continuing in the Saturn system, orbiting since 2004. Recent news from JPL notes that [Cassini has occasionally detected dust grains from outside the solar system](#). *Cassini* detects these grains of interstellar dust a few times each year by noting the speed and direction is very different from what’s usually found around Saturn. Other interplanetary probes have also had the same encounter, so it wasn’t a surprise when it was found again there. What’s unique with *Cassini* is that it’s the first probe to have the instruments onboard to be able to do a chemical analysis of the material.

Engineering Report By Brad McDonald

This will be a personal report on my recent prostate cancer treatment and I will be brief. I also apologize in advance for any typos and other errors. In case you hadn’t heard, I decided on getting surgery rather than using radiation as the primary means of fighting the cancer. The surgical option is a bit more involved, complicated and of course, invasive, but it was recommended by just about everyone. This was due to the fact that I had a rather aggressive form of cancer. Also, my father had died from prostate cancer and mine had appeared suddenly.

Having made the decision, I was scheduled for surgery Tuesday, April 5th. I arrived at

10:30, ready to go, with no jewelry, body piercings and no personal effects. Easy to do as I don’t have jewelry or body piercings. I was prepped and waited while my well-wishers gave me words of encouragement. Just as promised, by the time I was rolled into the operating room and the next thing I remembered was waking up, very slowly, as I don’t do well with medications.

Recovery was scheduled to be just one or two days, but it took three, due to a few complications. First, I was getting dizzy, later attributed to being a ‘quart low’ in fluids. After an IV of fluids, I was much better. Also, I had a slight temperature which had to be monitored. Once those items were cleared up and I had my ‘sea legs’ back again, I was ready to go home. Sister Colleen provided a minivan to minimize a difficult vehicle entry and exit

Once home, I concentrated on getting comfortable and making it through the first night. Today, Saturday, I got a treat, a genuine shower. At the hospital, I had a few ‘bed baths’ but this was a long and complete shower. I really felt much better. I also had a change of medical dressings which added to my feeling of cleanliness.

Back on regular food and feeling much better, I am writing this as we are getting a new data system, as the old one (DSL) kept crashing. Soon we will have fiber optics. Now things are really looking up!

Just got our new system back on line and I got even more good news. On the phone messages was my pathology report and it was all clear! All of my lymph nodes and surrounding tissues were all clear.

Further updates will be forwarded on to the *Kitty Hawk* as emails on a regular basis.

Star Trek On-Line

By Larry Cox

STO is a competitive game so the primary function is combat. This is done in space and ground engagements as an individual or in a team. Several locations provide continuous combat situations.

One of those, in the Delta Quadrant, is the Kobali system. The Kobali Prime, their homeworld, has been invaded by the Vaadwaur and they have sought assistance from the Federation to repel these invaders.

Full landing parties aren't allowed in combat zones due to the hazardous nature; usually the Captain and one or 2 other crew members (NPC).

Below, Captain Nelson arrives at the Kobali command center, in full combat kit (optional) with his First Officer and a Jem'Hadar crew member (the Jem'Hadar crew member was a combat reward from a previous mission).

In the upper right corner of the screen is a mini map HUD (Heads Up Display); this shows the local

Here the USS Thunderchild enters orbit around the Kobali Prime.

terrain with enemy and friendly positions. Players can join together in teams or go solo to complete missions. The "tray" HUD in the lower center of the screen are the weapons and abilities available for use by this character during this mission. Each primary player has a primary and secondary weapon; these are

the first to slots in the tray. Here Capt. Nelson has phaser high density beam rifle as his primary and a phaser sniper rifle as his secondary weapon. Players have options on the type and strength of the weapons they use. They can be bought, won or traded with other players through an "exchange". There is also a

research and development program to upgrade weapons.

Holding the Bridge.

Also included in the tray are leader abilities. These add a bonus to the statistical outcome of combat, of a “buff”. Some act as a counter to the opposing players buff to reduce its effect. Included here are a targeting optic to increase accuracy, “Fire on my Mark”, Rally Cry various other rallying boosts These are also variable and can be changed by the player.

The upper left HUD is the players stats, below that are the stats of the landing party at the time and in the bottom left is the chat box, used to chat with team or fleet members or other players in the local or “zone” area.

Freedom Balloon Fest By Larry Cox

On Memorial Day weekend WRAL is hosting the FREEDOM BALLOON FEST in Fuquay Varina and are looking for lots of volunteers. This is a great opportunity for service work and to give back to the community.

Here is the link. If anyone is interested in trying to go as a group, let me know and we'll see about grouping up.

<http://www.wralfreedomballofest.com/>

Yuri Gagarin By Diane Ripollone

April 12th came and went without much fanfare. But something happened 55 years ago that would help or maybe we should say be a huge part of the “Space Race”. Yuri Gagarin, became the first man to orbit the Earth.

Mr. Gagarin had all the essentials in his spacecraft, Vostok 1. Life support equipment relayed information on his condition back to Earth. Even though the flight was automated, he had a radio and television to communicate with mission control. During the flight if something went wrong or there was an emergency, Yuri had a key to take control of

the spacecraft. The flight consisted of a single orbit around the Earth. The spacecraft remained near the upper atmosphere and reached the lowest point at 169 kilometers. Mr. Gagarin would eject from spacecraft at 7 km altitude.

His flight made him a hero around the world. He was given awards and medals by the Russian government. In 2011, the United Nations declared this day the International Date of Human Space Flight. After the Cold War, we have heard more about the cosmonauts and realized their contribution to Space Flight was just as important as American astronauts.

So in reality, April 12th does mark an important day.

Communications Report By Elaine Pischke

Could we send a spaceship to Alpha Centauri on a journey that would take just 20 years? Stephen Hawking thinks it can be done, and has joined with billionaire investor Yuri Milner to create a \$100 million project called Breakthrough Starshot with the intention of using a wafer-thin chip and a miniscule sail propelled by a laser beam to reach Alpha Centauri. The Starshot won't be carrying any passengers, as it will be a nanocraft designed to send pictures and data back to Earth. A conventional spacecraft capable of carrying humans would take 30,000 years to make the same journey.

And apparently this is a thing. This was purchased at a place called "Geeksboro" in Greensboro. Geeksboro shows movies, hosts games of all kinds, and special events from knitting circles to trivia contests to 'drink and draw' evenings. Check it out if you are in the area. The day I was there, they were raffling off a life-sized Dalek. As for the Vulcan Ale, it is brewed by Shmaltz Brewing Company in Clifton Park, NY and you can learn more at FederationofBeer.com. Also available: Klingon Warnog and Syndicate Lager: The Orion Seductress.

Treasurer's Report by Larry Cox

The *Kitty Hawk* wants to begin accepting donations and revenue. To this end, we are in the process of applying for a Federal "Tax Payer ID Number".

Before applying to the IRS for an ID we felt we should first formalize our structure and apply for legal non-profit status. Not wanting to incur the cost of legal counsel, we are gathering information to try doing this on our own. The first step we're taking is to adapt a constitution and by-laws. Starfleet's constitution will serve as a guide for ours. Meetings of the

CO, XO, Second Officer, and others will shape and begin the process of establishing our specific individual by-laws.

Once this is in place, filing for non-profit status can be started. Non-profit status is obtained by filing forms and supporting documents with the North Carolina Secretary of State. The purpose of obtaining non-profit status is to avoid the possibility of income tax liability from accepting donations. After getting registered then we feel we'll be prepared to file checking account with the *Kitty Hawk* as the owner. With an

established checking account, we should be ready to start a treasury for accepting contributions and donations, which is our goal. With a treasury, we can fund special projects and make donations to agreed causes.

This is a work in progress; there is no great rush and we want to get this done correctly. Diligence is required to avoid possible tax liability on a personal as well as a group level. We're learning as we go with this, so any experience in this area by crew members is appreciated.

ST:TOS - Nobody's Son
By Brad McDonald

ACT FOUR

FADE IN:

EXT. SPACE – ENTERPRISE

Ship is at warp speed.

INT. ENTERPRISE – BRIDGE
– WIDE ANGLE

Spock exits turbo lift moving quickly to science Station.

KIRK

(to Spock)

The Klingons have drawn a line and are daring us to cross.

(thoughtfully)

If they were present when we picked up Karn, how did they get here ahead of us?

SPOCK

Logic dictates there are two Klingon ships. They have anticipated our course of action. If their mission failed, our return to Earth was a foregone conclusion.

KIRK

(to self)

Between a rock and a hard place.

SPOCK

Sir?

Kirk turns to face Spock.

KIRK

If you're right, we'll have Klingons behind us as well as in front of us.

SULU

All weapons ready, Klingon ship coming into range, sir.

CHEKOV

Ready for battle maneuvers sir.

UHURA

Incoming, sir. Hail from the Klingon, audio only.

KIRK

This ought to be good. Put him on, Lieutenant.

There's a bit of static, then:

KLINGON (V.O.)

We demand the return of the Klingon you are holding prisoner.

ON KIRK

He smiles at the demand and becomes firm.

KIRK

This is Captain Kirk commanding the Enterprise. You're in Federation space and attacking a ship on a rescue mission.

(beat)

We discovered a person, marooned who required surgery and is now recovering. If you wish his return, do so through proper diplomatic channels; not threats!

(beat)

I have help on the way, so you're on borrowed time.

WIDE ANGLE

There's a moment of silence, then:

UHURA

Nicely done, sir.

SULU

Incoming fire, sir!

KIRK

So much for talk and diplomacy. Execute battle maneuver omega! Target engines Sulu!

The ship is hit and rocks slightly, lights dim for a moment.

EXT. SPACE – ENTERPRISE

Ship turns and fires torpedoes and phasers.

KLINGON SHIP

We see weapons impact flair on Klingon ship.

INT. ENTERPRISE – BRIDGE
– WIDE ANGLE

SPOCK

(off console)

Little effect, their engines are well protected captain.

Ship rocks again from weapons impact.

SCOTT
Still holding but beginning to take a toll sir.

KIRK
Course three-two-zero, mark twelve. Let's try another angle of attack. Same target.

EXT. SPACE – ENTERPRISE AND KLINGON SHIP

Enterprise swings around as Klingon fires disrupters, missing. Enterprise fires phasers and strikes Klingons again.

INT. ENTERPRISE - BRIDGE – ON SCOTT

There's another weapons impact and lighting fades.

SCOTT
Beginning to show power drop off sir. We need to reduce speed and put more power to the shields.

KIRK
That's just what they want, the other ship will catch up with us.

UHURA (O.C.)
Incoming, sir!

KIRK
(annoyed)
What? More threats?

Uhura looks surprised.

UHURA
No, sir. Sickbay!

ON KIRK

He's dumbfounded and slams the intercom on his chair.

KIRK
Bones, not now, I'm –

MCCOY
(interrupting)
It's not me, it's Karn!

SICK BAY – TWO SHOT – MCCOY AND KARN

Karn is still in bed and weaker but very excited.

KARN
(straining)

Don't target the bridge or engines, they've been strengthened. Focus on the cloaking power supply at the base of the hanger. It's a weak spot!

BRIDGE – ON SPOCK

He's working quickly at his station.

SPOCK
Scanning area Captain.
(beat)

I have it. Power coupling barely detectable.

ON KIRK

He smiles to himself, confident and knowing.

KIRK
The shields are tied into it, too. If we knock it out they won't be able to cloak and their shields will be weakened.

ON COMMAND SECTION

SULU
They'll be easy targets this deep in Federation space.

KIRK
Navigator, bring us around. Sulu, target that point!

SULU
Ready, sir.

KIRK
Fire!

EXT. SPACE – ENTERPRISE
Firing phasers.

KLINGON SHIP

Weapon's impact flares and rocks ship.

INT. ENTERPRISE – ON SPOCK

SPOCK
(off console)
Direct hit, shield output now dropping significantly.

NEW ANGLE

KIRK
While they're licking their wounds and trying to decide what to do... Chekov, back on course to Earth. Best possible speed... Scotty?

SCOTT
Warp six point five, sir. Sorry.

KIRK
Get to engineering and see if you can squeeze out a bit more!

Scott jumps up and heads to exit.

SCOTT
Aye, sir! On my way!

SPOCK
(off console)
Alien is not pursuing us
sir.
Kirk smiles broadly and stands.

KIRK
Right now, he's got
bigger problems to solve.
(beat)
Stand down to yellow
alert. Maximum range on
scans, just in case.

SULU
Aye, sir.
(off console)
Captain? Incoming
ships.
Kirk looks at Sulu and tenses;
Sulu smiles broadly.

SULU
(continuing)
Ours, sir!

ON KIRK
He relaxes and smiles back.

KIRK
Figures. Reinforcements
after the battle is won.
(to Uhura)
Send to ships location of
the Klingon ship and the
weakness. they can
escort him back to his
own space.

NEW ANGLE

UHURA
Sir, it's Sickbay again.

KIRK
Tell McCoy I'm on the
way.
(beat)
Mr. Spock, care to join
me?

SPOCK
Indeed, I would.
The two head for the exit.

KIRK
(moving)
Sulu, you have the conn.

Kirk and Spock exit.

TURBOLIFT – TWO SHOT –
KIRK AND SPOCK

KIRK
Computer, sickbay.
The turbolift doors close and
begins to move. In B.G. we can
see the movement.

SPOCK
If I may, I would like to
discuss something with
you.

KIRK
Go ahead Spock, speak
your mind.

ON SPOCK

SPOCK
I would like to become
an advocate for Karn.

KIRK (O.C.)
How's that?

SPOCK
Perhaps the word is...
inappropriate. There is
no precise translation
from the Vulcan. Maybe
sponsor is a more
appropriate word.

KIRK (O.C.)
(confused)
To what purpose?

SPOCK
I believe Karn could
become a valuable asset
to the Federation and
even StarFleet itself.

ON KIRK
He's surprised by the idea and
amused.

KIRK
A Klingon serving aboard
a starship?
(beat)
I know the Organians
predicted we'd be friends
with the Klingons at
some point, but... now?

AS BEFORE – ON SPOCK

SPOCK
I sensed his lack of...
belonging. No purpose
or feeling of worth.
perhaps if we offered
him an opportunity...

KIRK (O.C.)
(curious)
Such as?

SPOCK
He seems interested in
Vulcan. He could start
there...

ON KIRK
He's deep in thought and nods
in understanding.

KIRK
Yes. I see your
reasoning.
(beat)
It could work at that...

The turbolift stops, doors open
and the two exit.

SICKBAY – TWO SHOT –
MCCOY AND KARN

McCoy is hovering over Karn
when he notices Kirk and
Spock enter. Diagnostic
readings are all low. McCoy
leaves Karn to meet Spock and
Kirk.

NEW ANGLE

MCCOY
(moving)

I'm sorry Spock. He's dying, just minutes more. He was quite ill when we called the bridge about the cloak.

KIRK
(confused)

What happened?

ON MCCOY

MCCOY

The Klingons built a second fail-safe, biological. It was part of the impurities in his blood. I attributed it to his human half. I was right, but there was more.

THREE SHOT – MCCOY, KIRK AND SPOCK

KIRK
(thoughtful)

So the Chancellor had the final word after all.

SPOCK
May we speak to him?

MCCOY
Can't do any harm at this point.

Spock moves off. Kirk is about to follow when McCoy stops him and shakes his head.

TWO SHOT – KIRK AND MCCOY

KIRK
I just wanted to thank him...

MCCOY
(quietly)

It's better if Spock talks to him alone; kindred souls and all that.

Kirk stares at McCoy for a beat waiting for an explanation as McCoy watches Spock and Karn in B.G.

ON MCCOY

MCCOY
(continued)

Both are half human, not accepted on their home world. Both are at odds with their fathers. Both join the service to get away from difficulties at home. Both had understanding and highly motivated mothers, need I continue?

AS BEFORE – TWO SHOT – KIRK AND MCCOY

Kirk nods in understanding. The two then turn to watch Karn and Spock.

ON KARN AND SPOCK

Karn tries to make a live long and prosper sign but hasn't the strength.

KARN
(whispering)

Well, you know what I meant.

SPOCK
Yes. I am honored by the gesture, Karn.

ON KARN

KARN
(whispering)

I wanted you to know that the few moments we spent together and the mind meld were very... helpful. I think we could have been... friends.

SPOCK
As do I. Is there anything...?

KARN
Yes, the teachings of Solen paved the way for remembering those who we have... lost.

Spock is surprised by the statement, then touches Karn in a mind meld.

SPOCK
Remember...

ON THE DIAGNOSTIC BED INDICATORS

Slowly they fade and drop to the bottom.

ON SPOCK

Spock withdraws his hand and stares blankly. Is he getting emotional?

Off Spock's reaction...
